## Golden Rim to Raise A\$5.3M to Accelerate Drilling at Kouri

### Event

Golden Rim has announced that it is raising A\$5.3M to accelerate the drilling at Kouri.

### Comment

This announcement follows hard on the heels of the excellent drill results announced on the 5th August 2019. Golden Rim has received firm commitments for a share placement to raise circa \$1.82M in conjunction with a fully underwritten rights issue to raise a further circa \$3.45M (total \$5.27M). The company has received firm commitments for a share placement to raise approximately \$1.82M (before costs) through the issue of approximately 130M fully paid ordinary shares in the Company (Shares) at an issue price of 1.4 cents per Share (Placement). There was significant excess demand for the Placement which was strongly supported by institutional, sophisticated and existing shareholders.

The Company is also pleased to announce a fully underwritten 3 for 11 pro rata renounceable offer of Shares at an issue price of 1.4 cents per Share (Issue Price) to raise up to approximately \$3.45M (Rights Issue) before costs. The Issue Price represents a 17.6% discount to the last traded price of 1.7 cents and a 23.2% discount to the 15 day VWAP (volume weighted average price) of 1.8 cents. Eligible Shareholders may also apply for Shares in excess of their Entitlement at the Issue Price.

The Placement and underwritten Rights Issue enables Golden Rim to accelerate exploration work at Kouri with a further 14,000m RC and diamond drilling program to commence in the coming weeks with the objective of significantly growing the existing Mineral Resource.

It is very positive that Golden Rim has been able to raise fresh money to mount an aggressive additional exploration programme. With the results of another 14 RC holes drilled at the Diabatou and Maré prospects, and the projected northeast strike extension of the existing 1.4Moz Mineral Resource into the new Gouéli Permit pending, and results due in the coming weeks, the company is working hard to significantly increase its ore resources.
